

Web App Guide

Tour

1. Click the **let's go** button on the main page
2. The app will redirect you to the tour page where you can select your start point or view all the locations in the school

The embedded Google Map Satellite view allows you to identify if you are at the side or front gate

[Side gate → ISH, Front gate → Atrium]

3. Click on **All locations** and you will see a list of all the locations in the school. Click the **pink button** with the name to see the detailed description and image of the location
4. The location view will show you the name, detailed description and a large image of the location.

There is a list of **exit points** below the image that lets you move to the next closest location. A location can have multiple exit points.

If you wish to go back to the start of the tour, click the tour button on the navigation bar at the top

Administration

1. Click on the administration button on the navigation bar
2. Login:
Username: admin
Password: admin
3. Here you can select to add new locations, update existing or delete a location

Add

Complete the following fields with the respective data:

- Location Name (**Compulsory**)
 - Location Description (**Compulsory**)
 - Image (**Optional**) [Upload from computer]
 - Exit Point (**Optional**)
 - The exit point allows you link a new location to another existing location. The link created is automatically bi-directional (E.g: ISH linked to Canteen means canteen is linked to ISH)
-

Update

1. Select the name of the location you wish to update using the dropdown

Complete the following fields with the respective data:

- New Name (**Optional**)
- Location Description (**Optional**)
- Image (**Optional**) [Upload from computer]
- New Exit Point (**Optional**)
 - If the new exit point selected is the current place or already exists, the app will display "Update failed"
- Remove Exit Point (**Optional**)
 - If the exit point has been successfully removed or does not exist, the app will display "Update successful"
 - The exit point removed is automatically bi-directional (E.g: Both the link between ISH → Canteen and Canteen → ISH will be removed if either one is deleted)

All fields marked as optional will not be updated if left blank and only non-empty fields will be updated

Delete

1. Select the name of the location you want to delete
2. The location as well as any exit points that contain the deleted location will be deleted
